KI HYPER REALITÄT

Wenn Prozessautomation und Realitäten verschmelzen

Katrin J. Yuan

WHAT IS DIGITAL PROCESS MANAGEMENT (DPM)

DEFINITION

-  • Application of digital technologies to optimize business processes
-  • Integration of process modeling, automation, and analysis
-  • leverages digital tools such as workflows, automation, analytics, and integration

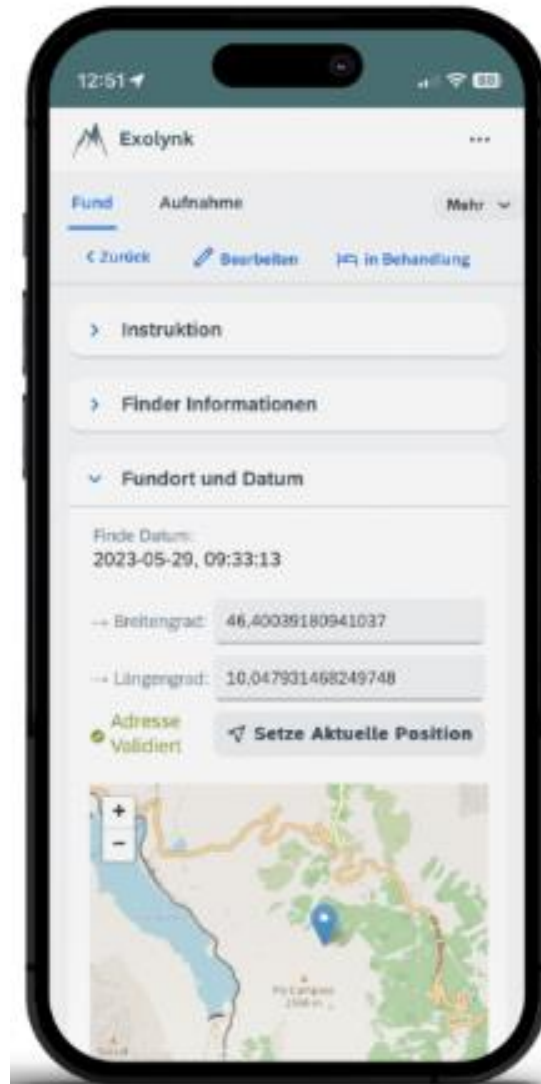

GOAL

-  • Increase process efficiency and effectiveness
-  • Improve transparency and control
-  • Reduce costs and errors

CASE STUDY: VETERINARY PATIENT RECORD

Coordinate locations, finders and wilderness release

The integrated address database can be used to manage contact information for finders and rehabilitators and to record the exact locations where the animals were found and released so that they can be released back into their natural habitat after treatment.

Implementation period:

- 12 hours (initial)

*This solution is now available as a ready-to-use application (to the product)

CRITICAL ASSESSMENT

Oprah Winfrey

facial analysis

a complete analysis of facial attributes, including confidence scores

The image shows a screenshot of a facial analysis tool. On the left, a photograph of Oprah Winfrey is displayed with a blue bounding box around her face. On the right, the analysis results are shown. The results include a small thumbnail of the face, a confidence score of 99.9% for "looks like a face", and a highlighted result "appears to be male" with a confidence of 76.5%. Other results include "age range" of "26 - 43 years old". Below the results, there are expandable sections for "Request" and "Response". At the bottom left, there is a section for "Use your own image" with an "Upload" button and a link to "or drag and drop".

Results

looks like a face 99.9 %

appears to be male 76.5 %

age range 26 - 43 years old
